## SUMMARY

---

I'm a **web engineer** with intense focus on web and mobile development. Strong interest in user experience. Coding is my passion (particularly in JavaScript). Interested in experimental technologies, user experience and cross-platform development.

I have worked on a variety of **languages** (JavaScript, C#, Typescript, CoffeeScript, Node.js, C, Java, PHP, SQL, PLSQL), **frameworks** (.NET, Spring, GDK, XNA, SAP R/3...) and **operating systems** (Mac OS X, Windows, Linux, Android and iOS). I have **strong coding and debugging skills**. My current focus is single-page applications (SPA) web apps, cross-platform native apps, UX and WebGL.

Experienced **defining and managing agile UX processes**. Trained, coached and managed remote and local teams to encouraging self organization, come up with reusable elements, use the best practices, provide visibility to team impediments/risks, help to come up with quality shippable product that meet the product goals and provides a good user experience.

## WORK EXPERIENCE

---

### Lead UX @ MoneyMate Limited

July 2013

MoneyMate is a specialist provider of investment product information management solutions to global asset managers like State Street or JP Morgan. My job as lead the user experience is to **define and manage the user experience process** in the analytics team (developing investment analytics tools for insurance brokers and consumers). I also participate in some of the UX tasks (User Research, prototyping, Wireframes, Sketches, Scrum planning, etc.) and continue to participate on my previous development tasks.

### Key achievements

- When I joined MoneyMate the company didn't have a UX team or process or team. The team was put together after the success achieved on the development of fundcentre.newireland.com.
- We have established an User Experience process within the development process and has been running for over 6 months.
- We have established User Experience and style guidelines has been in usage for over 6 months.

### **Web Engineer @ MoneyMate Limited**

**March 2012**

I originally joined MoneyMate as a web engineer. My job was to develop RestFul services and web based user interfaces using Microsoft .Net technologies (ASP.NET MVC, Web API, Ninject, MSQL, Nunit, etc.). After a few months became more and more focused on JavaScript, we started to write **single-page application with client-side MVC architecture** (ember.js, require.js) **and client-side rendering** (handlebars.js).

#### **Key achievements**

- I introduced the concept of single-page application and responsive design to the development team and as a result of that we started using ember.js and twitter's bootstrap in all our new projects.
- One of my projects (fundcentre.newireland.com) was selected as semi-finalist "**Best financial services website**" by the **Realex Fire Web Awards**.
- I made the management team realise how important is the user experience for our products and as a result of that the company created a UX team and I was promoted to Lead UX developer.

### **Web Engineer @ Club Travel Limited**

**March 2011**

Club Travel has been established for more than 35 years and is the single largest travel management company in Ireland. Club Travel has a quite big **intranet that allows the company to manage multiple aspects from the business going from employees timesheets to online payments, refunds or invoicing**. My job was to participate in the development of many of those applications. I migrated some legacy applications (ASP Classic) to ASP MVC 4/WebAPI and I developed some new applications from scratch.

#### **Key achievements**

- Successfully developed a centralized online payments web API.
- Successfully developed a centralized currency exchange web API.

### **Web Engineer @ Guadaltech**

**September 2010**

GuadalTech Technologic Services is one of the leading IT companies in Seville (Spain). They deliver software consulting and outsourced managed services for multi-national companies like Heineken. My job was to develop **reporting tools with Java and SAP R/3 that allows Heineken to manage the cost running the business one overcome some potential issues** like power outage.

#### **Key achievements**

- Successfully developed disaster recovery application that allow to generate waybill documentation even when an internet connection is not available.
- Successfully developed a reporting tool that allows Heineken to audit the usage of printers, tonners and printing paper by their employees globally.

### **Web Engineer (Internship) @ Lucca Leadership**

**May 2010**

Lucca Leadership is a global charity that aims to uplift communities all over the world by developing new generations of transformational leaders. My jobs as an intern was to **develop the Lucca Leadership website using the LAMP stack**.

#### **Key achievements**

- Successfully developed the Lucca Leadership website

## PORTFOLIO, BLOG & PERSONAL PROJECTS

---

If you want to see some of my work as web developer please visit my [portfolio](#). When I have some free time I write a [blog](#) about JavaScript and web development and some open-source mobile apps and websites with my best college mate. We will soon publish our first commercial app [Dublin RTPI](#) (real-time public transport information) and [www.dev-conf.org](http://www.dev-conf.org) (A library of software development talks from the best conference around the world).

## RECOMMENDATIONS

---

### Micheal McLoughlin - Development Team Lead @ MoneyMate

*As a member of the development team Remo has been involved in every aspect of solution development. Remo works with a wide range of technologies. Is an invaluable member of the development team. He is organised, efficient and extremely competent. In addition, he has an excellent rapport with managers and colleagues alike.*

### Miguel Merayo - Senior Software Engineer @ Ezetop

*Remo is one of those people who always wants to build good software, and he knows how to do it. He is a precocious developer, really up to date in technologies and best practices.*

### Robert Mulhall - CEO @ Lucca Leadership

*Remo reported directly to me but had to carry out the work to suit our teams in Ireland, UK, Netherlands, Macedonia, USA, Australia and South Africa. This meant that he was working on a global website and local websites within the global website structure. It was a very challenging task and one that was badly needed by Lucca Leadership.*

*I found Remo to be professional and diligent in his work. He was always committed to his work plan and the organization and went above and beyond his role to help out when needed. Remo is a hard worker and was able to bring new ideas and ways of working to our organization. He has very good technical abilities and when he did not know how to do something he would research the solution himself.*
